

The Research Council graphic profile

Guidelines relating to our logo and graphic design.

[The Research Council of Norway's graphic style manual](#) contains guidelines for graphic design and production, and includes templates for designing printed materials as well as downloadable logos.

In connection with the launch of our new website, we have also produced [a manual relating to digital screens](#).

We are currently updating the original version of our style manual and working towards consolidating the two manuals into one.

Our logo is available in Bokmål and Nynorsk as well as English, and may be reproduced in colour, black and negative versions. There are separate logos for projects that have been granted funding. The logo must always encompass the symbol as well as the text. No adjustments to the size or placement of the symbol and text are permitted. Guidelines on the use of Research Council logos are available in the style guide.
