

FRIPRO Toppforsk - Universitetet i Bergen

FRIHUMSAM

Prosjektnr.	Tittel	Ansvarlig institusjon
250127	Workplace bullying: From mechanisms and moderators to problem treatment	Institutt for samfunnspsykologi, Universitetet i Bergen
250598	THE IMMIGRATION ISSUE IN SCANDINAVIAN PUBLIC SPHERES 1970-2015	Institutt for informasjons- og medievitenskap, Universitetet i Bergen

FRIMEDBIO

Prosjektnr.	Tittel	Ansvarlig institusjon
249843	N-terminal acetylation as a key physiological regulation mechanism	Molekylærbiologisk institutt, Universitetet i Bergen
249951	Molecular control of Arc protein: Decoding a master regulator of synaptic plasticity and cognition	Institutt for biomedisin, Universitetet i Bergen
250005	ACCELERATED EVOLUTION IN CHORDATES AND THE ORIGIN OF LARVACEANS	Sars International Centre for Marine Molecular Biology, Universitetet i Bergen
251185	The unlimited neurogenic potential of a sea anemone as a new model to understand the generation of neurons in embryogenesis and regeneration	Sars International Centre for Marine Molecular Biology, Universitetet i Bergen

FRINATEK

Prosjektnr.	Tittel	Ansvarlig institusjon
250858	Clinical prototype of a proton CT based on a tracking calorimeter	Institutt for fysikk og teknologi, Universitetet i Bergen
250223	Thermo-Mechanical Subsurface Energy Storage	Matematisk institutt, Universitetet i Bergen
